MultiSource Manufacturing LLC Completes 11th Acquisition since Inception in 1998

Minneapolis, July 7, 2010

MultiSource Manufacturing LLC announces the acquisition of Peterson Machine & Manufacturing, located in Lakeville, MN. Peterson's operations will be consolidated into MultiSource Manufacturing's Douglas division in Burnsville, MN, on or before September 30, 2010. Both Rob and Bob Peterson will continue working with MultiSource, as will all of their skilled machinists. "Peterson Machine provides milling and turning expertise to its customers, with a focus on milling. Our Douglas division's machine shop provides similar services with more of a focus on turning. The two operations are a natural fit." said Mike Schuffenhauer, COO of MultiSource.

"The growth potential of Peterson's customer base and strong management culture make it a natural fit for our growth strategy. We look forward to working with the Peterson management team to help take them to the next level and to provide our newly-combined customer base with additional capabilities."
